

## **Mark your calendars!**

**Public Works Trust Fund (PWTF)**

**&**

**Drinking Water State Revolving Fund (DWSRF)**

**Application Workshops**

The Public Works Board and its partners the Department of Health are pleased to announce the annual application workshops.

The Workshops are structured into three sessions:

- n PWTF 2005 Construction Application
- n DWSRF 2004 Construction Application
- n How to Develop Financial Capacity for Infrastructure Projects

# PUBLIC WORKS BOARD

## INVESTING IN WASHINGTON

### PWTF 2005 Construction Application

The Public Works Trust Fund (PWTF) provides low-interest loans and technical assistance to local governments that have critical public works needs. The PWTF is entering its Twentieth year, and has assisted local governments in financing over 1,300 infrastructure projects totaling \$1.3 billion in PWTF funding.

The PWTF continues to be an extremely competitive program, so if you manage a local government or are responsible for the infrastructure in your community, then you'll want to sign up for the workshops and learn the in's and out's of completing a competitive application. Hear how other communities have solved similar problems. Meet with your Client Service Representative and learn how they can help.

There is approximately \$100 million available this funding cycle. Borrow up to \$10 million dollars with as little as 0.5% interest. The PWTF can meet your community where you are. Whether you are planning a project, or are ready to start construction, the PWTF has a loan program to fit that need.

### A Responsive Future Built on a Remarkable Past

It was 20 years ago today that, representatives from interested parties recognized that local infrastructure was beginning to fail and that it would only get worse if nothing was done. As a result, they assessed the need for and created the Public Works Trust Fund to help finance the repair and replacement of roads, streets, bridges, water systems, sewer systems, and storm water systems. A few years later they added recycling and solid waste systems to the list.

Call today to request your application  
(360) 586-4122

In preparing for the next 20 years, the Board is conducting a comprehensive assessment of its mission, programs, priorities, and business practices. It is prepared to consider options ranging from minor tweaks to major revisions. The Board wants the users to have the strongest voice in this process. What do counties, cities, and special purpose districts need? How do we keep the Public Works Trust Fund responsive to those needs for the next 20 years? Come and hear what the Board is doing. Please join the Board as it looks at what it does and how it does it. Help the Board make the next 20 years as productive as the first two decades.

### Local Government Infrastructure Tracking System

The Infrastructure Assistance Coordinating council (IACC), the Transportation Improvement Board, and the Public Works Board are working together to create a web-based Local Government Infrastructure Tracking System. The Tracking System will enhance coordination among local jurisdictions, state and federal infrastructure program, the Legislature, and the Governor. Come and see a demonstration of the new system.

### DWSRF 2004 Construction Application

The Drinking Water State Revolving Fund (DWSRF) can help finance capital construction costs to improve water quality for your consumers and improve your compliance with drinking water regulations. Your water system may be eligible for a low-interest loan to fund a project such as a treatment facility, water main replacement, a

new reservoir, or a security project that supports protection of public health and safety.

The program is now gearing up for the 2004 loan cycle. Over \$20 million will be available to fund drinking water capital construction projects. The program's goal is to increase public health protection and drinking water system compliance.

Washington is a national leader in getting these funds out to public water systems. Over \$160 million dollars have been committed to drinking water infrastructure improvements in Washington since the DWSRF program was introduced in 1997.

### How to Develop Financial Capacity for Infrastructure Projects

This session covers the impacts of capital financing on user charges. It examines full cost pricing of services and capital improvements and provides a Financing Assessment Tool. This tool is a free Excel worksheet designed to help communities determine the impact of future capital improvements and the effect of full-cost pricing on their budget. The Financial Assessment Tool may also be used to demonstrate financial capacity when developing a Small Water System Management Plan.

Applications are due May 11, 2004
